# 84 & 85 SERIES

### 7" Bag Filter Housing

The **84 & 85 Series** bag housings are designed for use with the industry standard **DuoLine** G Series 7" ring style bags widely used in today's process industries. The top opening style is equipped with a Cast Vee clamp as standard with the option of Rathmann style hinged and bolted closures for pressures up to 10 bar g. The housing will accept the full range of Amazon and industry standard bags ranging from 1 to 1000µm with nominal lengths of 16" (P1) and 32" (P2) and Amazon's own 48" triple length bag.

The **84 Series** is free standing with side inlet and outlet connections. These standard diameter filter housings offer great flexibility in terms of high flow and high dirt capacity whilst requiring only a limited footprint.

Use of the inverted dished end style free standing 84 Series housing is ideally suited to continuous process operations where economy and low volume hold up is paramount.

The 85 Series is infinitely flexible with adjustable legs and bottom outlet connection, making it ideal for batch applications, where free draining and frequent process changes take place. Widely used in the chemical process world, the 85 Series housing, when equipped with the optional Rathmann style hinged and bolted closure, has proved to be the most popular model produced today.

Distinguished by its economy, high build quality and wide ranging options list, this housing can be used in almost all areas of the liquids processing industry.

#### **Product Features**

- Positive bag seating mechanism to minimise risk of seal bypass
- Robust bag support basket assembly fabricated from perforated sheet rather than wire mesh for extra strength
- Internally and externally electropol shed as standard
- Wide range of options available for connection sizes and types and materials of construction
- Rated up to 10 bar g liquid, 4.5 bar g gas

#### 84 Series housings feature:

- Vee clamp or hinged and bolted style closures
- Inverted dished end
- PED and ATEX Compliant

#### 85 Series housings feature:

- Vee clamp or hinged and bolted style closures
- Conventional dished end to aid clean down
- Each housing hydrostatically pressure tested
- PED and ATEX Compliant

### Features and Benefits

- Integral vent to aid efficient filter changeout
- Each housing is etched with a unique serial number for full traceability
- Full housing customisation service available
- Internally and externally electropolished as standard

### **Product Range -**

Amazon Filters design and manufacture an extensive range of liquid filtration systems, providing one of the widest selections of filtration vessels, depth filters and pleated cartridges available today, ensuring excellent process and filter compatibility. As one of Europe's leading manufacturers of filtration systems, Amazon Filters is able to offer a solution to meet all filtration requirements. Amazons' filters are manufactured in clean room conditions and all products come with detailed Product Validation Guides and Technical Support documentation.
